Personal Statement

Self-taught Full-Stack Developer passionate about building fast, responsive, and scalable web applications. Experienced in React, Next.js, Tailwind CSS on the front-end, and Express.js with Node.js on the back-end. Skilled in designing REST APIs, handling authentication, and working with databases. Motivated problem solver with strong debugging skills and eager to collaborate within a team environment to grow professionally.

Technical Skills

- Languages & Web: JavaScript (ES6+), HTML5, CSS3
- Front-End: React.js, Next.js
- UI & Styling: Tailwind CSS, Responsive Design
- Back-End: Node.js, Express.js
- Database & APIs: MongoDB, RESTful APIs (CRUD, Authentication)
- State Management: Zustand, Redux Toolkit (basic)
- Tools: Git, GitHub, Agile Collaboration

Projects (as Practical Experience)

- E-Commerce Store – Full-stack store with Next.js (front-end) and Express.js API integration. Features: product listing, search, filtering, cart, checkout, and orders. [GitHub](https://github.com/kareem679/E-commerce)

- Portfolio Website – Personal portfolio with React, Next.js, Tailwind CSS to showcase projects & resume. [Live](https://my-portfolio-alpha-five-87.vercel.app/)

- Sign In System – Authentication project using Next.js with Express.js backend. Includes JWT-based sessions and modern login methods. [GitHub](https://github.com/kareem679/Login)

- To-Do App – Task management app with React and API integration, featuring proper loading and error handling. [GitHub](https://github.com/kareem679/Todo)

Education

Self-taught — Specialized in Full-Stack development by building real-world projects, studying documentation, and completing online resources such as coding bootcamps and tutorials.

Personal Strengths

- Strong problem-solving and debugging skills
- Ability to design and consume REST APIs
- Understanding of both front-end and back-end workflows
- Fast learner of new frameworks and tools
- Good time management and organizational skills
- Highly motivated to learn and collaborate in a team
